JE

Professional Summary

Statistician and data scientist with strong experience in biomedical and clinical research, specialized in the design and implementation of predictive models, statistical analysis and health-related research. I have collaborated on projects deploying AI models in web applications and building NLP pipelines. I stand out for analytical rigor, professional ethics and the ability to work in multidisciplinary teams.

Experience

Biostatistician & Data Analyst *FIMABIS - Hospital Costa del Sol, Marbella* **Nov 2024 – Present**

- Methodological and statistical advice for clinical research projects.
- Management, cleaning and administration of clinical databases, ensuring data quality.
- Support in the design and monitoring of research protocols.
- Implementation of an NLP application for qualitative clinical analysis.

Intern / Thesis Student *Hematology Unit, Polyclinic Sant'Orsola, Bologna, Italy* **Feb 2024 – Jul 2024**

- Conducted statistical inference and survival analysis in multiple myeloma patients.
- Managed and analyzed clinical and genetic data in survival studies.

Data Analyst *Ministry of Economy, Planning and Development, Santo Domingo* **Feb 2021 – Oct 2022**

- Analysis and interpretation of large datasets using statistical software.
- Development of reports and data visualizations for projects focused on vulnerable populations.
- Preparation of statistical and technical data for presentations to senior public-sector leaders.

Education

Master in Data Science *University of Granada* **Sep 2024 – Sep 2025**

Master in Statistical Sciences *University of Bologna, Italy* **Sep 2022 – Jul 2024**
Specialization: Health and Population Analytics

Bachelor in Economics *Instituto Tecnológico de Santo Domingo* **Nov 2017 – Apr 2021**

Technical Skills

- **AI:** NLP pipelines, conversational agents.

- **Programming:** Python, R, SQL, SAS.
- **Machine Learning:** Clustering, supervised classification, time series.
- **Study Design:** Sample size calculation, statistical inference, survival analysis.
- **Clinical Data Management:** Cleaning, normalization and analysis of health datasets.
- **Communication:** Scientific writing and conference presentations.

Certifications

- **ICH E6 Good Clinical Practice (GCP)**
- **TOEFL:** English proficiency, C1
- **CILS:** Italian proficiency, B2

Additional Training

- **MOOC UGR – Machine Learning and Big Data for Bioinformatics (2025):** 5th edition. 100 hours (4 ECTS). Training in machine learning models, biomedical data processing and analysis.
- **Data Science Certification:** SAS Certified Specialist - Base Programming
- **Microcredential:** “Data for Better Lives: A New Social Contract” – Distinction, World Bank

Conference Presentations

- **Oral presentation:** “From Qualitative Data to a Virtual Health Assistant: Developing a Patient-Centred Preoperative Chatbot”. INNODATA 2025 — II National Congress on Innovation through the Use of Health Data. Seville, 2025.

Recent Projects

- **Co-author on Scientific Article (2025):** “AI-Enabled Natural Language Processing Uncovers Hidden Pre-operative Concerns in Patients Awaiting Total Knee Arthroplasty”. Development and analysis of an NLP model applied to health data.
- **Thesis (2024):** Survival analysis of second-line therapy in multiple myeloma patients. Application of machine learning techniques and multivariate analysis in clinical cohorts.
- **Personal Project:** Interactive Streamlit dashboard to monitor dependency indicators (MACROSAD). Backend integration, visualization and time series forecasting.
- **Institutional Report:** “Rurality in the Border Region: Relevance, Limitations and Opportunities”, a report including statistical and geospatial analysis.
