Professional Summary

Statistician and analyst with solid experience in biomedical research and clinical analysis, specialized in methodological and statistical consulting for projects in hospital settings. With advanced training in Statistics and Data Science, I have worked on managing and cleaning clinical databases, applying predictive models, and utilizing machine learning techniques in social and health research contexts. I am known for my precision, professional ethics, and ability to work in multidisciplinary teams.

Experience

Junior Biostatistician and Researcher *FIMABIS - Hospital Costa del Sol, Marbella* **Nov 2024 – Present**

- Provided methodological and statistical consulting for clinical research projects.
- Managed, cleaned, and administered clinical databases, ensuring data quality.
- Supported the design and monitoring of research protocols.

Internship / Thesis *Hematology Unit, Sant'Orsola Polyclinic, Italy* **Feb 2024 – Jul 2024**

- Conducted statistical inferences and survival analysis in patients with multiple myeloma.
- Managed and analyzed clinical and genetic data in survival studies.

Data Analyst *Ministry of Economy, Planning and Development, Santo Domingo* **Feb 2021 – Oct 2022**

- Analyzed and interpreted large volumes of data using statistical software.
- Developed reports and data visualizations for projects focused on vulnerable populations.
- Prepared statistical and technical data for presentations to senior public sector executives.

Education

Master's in Data Science *University of Granada* **Sep 2024 (In progress)**

Master's in Statistical Sciences *University of Bologna, Italy* **Sep 2022 – Jul 2024**
Specialization: Health and Population Analysis

Technical Skills

- **Programming:** Python, R, SAS, SQL, QGIS, Linux
- **Machine Learning:** Clustering, Supervised Classification, Natural Language Processing
- **Data Visualization:** Power BI, QGIS, Streamlit
- **Research Design and Statistical Protocols:** Sample size calculation, Survival Analysis, Statistical Inference, among others
- **Clinical Data Management:** Cleaning and administration of biosanitary databases
- **Communication:** Writing and presenting results at conferences and in scientific publications

Certifications

- **ICH E6 (R2) Good Clinical Practice Guidelines**
- **SAS:** Certified Specialist Base Programming
- **World Bank:** “Data for Better Lives: A New Social Contract” – Certification with Distinction
- **TOEFL:** C1 English Certification
- **CILS:** B2 Italian Certification

Recent Projects

- **Co-author in Scientific Article (2025):** “Use of Digital Communication Channels for the Assessment and Detection of Information Needs in Patients Awaiting Total Knee Arthroplasty”. Analysis focused on natural language processing in collaboration with Costa del Sol University Hospital.
- **Thesis (2024):** Survival Analysis in Second-Line Therapy for Patients with Multiple Myeloma, in collaboration with Sant’Orsola Polyclinic in Bologna.
- **Institutional Publication:** “Rurality in the Border Zone: Relevance, Limitations, and Opportunities”, a report focused on geospatial analysis.
